Be involved. Transplant hope.

Join the Be The Match Registry®.

Patients need you! For thousands with blood cancers like leukemia or other diseases like sickle cell anemia, a marrow transplant is their only hope for life. If you have diverse ancestry, patients especially need you because they are most likely to match someone who shares their heritage.

Alyssa Oxenford, a former student and lacrosse athlete at East Stroudsburg University was 21 years old when she was diagnosed with Leukemia. Alyssa and her family were vacationing in North Carolina when she was diagnosed. They cut their vacation short to return home where Alyssa was admitted into the Hospital at the University of Pennsylvania to immediately begin treatment. Alyssa achieved remission and was scheduled for a marrow transplant procedure when she relapsed.

Alyssa has kept a positive attitude throughout this journey and will continue to do so as she begins another battle against Leukemia. Alyssa's lacrosse teammates are rallying to help her fight. Join us! Help Alyssa and other patients searching for a marrow donor by joining the Be The Match Registry.

Come out and swab your cheek on Friday, Dec. 5th

You could be the **MATCH** that Alyssa and other patients are searching for.
